28 XII 51

Went. I'm here to learn what ODM should do + who we should send hereafter.

Juchman: passes out abstracts E area State emerg. exercise + recent St. desk tv from 1047

Review State drafts distributed. He cancelled ea. part of E area. Presumes ODM screened + ODM ret'd the 1st 4 attached to develop concrete msg.

27 XII Walter Radus gave Gus last document attached which he got from ODM + interpreted as an ODM directive. This will have to be

Re assumptions Gus was given only that TN atk on US should be assumed; no enemy stated. Gus Volk REP made added assumption for his purposes that war was on

Slaght: Raises question as to basic functions & which agency is respon for what & as prelim. to working out details. Need to know 1st who has resp. for what as prelude to how to do.

- Ques:
- (1) Agree (asking Winant)
 - (2) Are we preparing every action steps for real use or for the June exercise?
 - (3) Ple give us an elementary introduct.

Winant I'm just out of hospital for 3 mos. I'm not ready to speak; John Knoper has been working on this.

Considerable staffers come from shops of last summer; no set up for 8 am to work thru; no foreigners available & ~~not alone~~

Honestly can't give you one today. I agreed with you only to come and listen & then decide who'd help you.

CONFIDENTIAL

Wenant

General comments:

We were all fooled up on who was doing what re export controls last summer

Gus

Who sets assumptions? The other agencies, or does ODM set them.

Wenant

Not sure: you must have them but don't know what yet. Believe ODM would supply the frame of reference

(ICATOS was KA relocation spot)

There is a ^{new (6 mos old)} set of NATO assumptions on nuclear bases + they have not yet digested the intangibles + difficulties. These have caused a revision of all planning, but planning hasn't caught up; under there for thought people involved in, 1st cont. got 2nd, suffered 3rd.

Gus:

Can we divide up the work in 1/1 + have drafts plus drafters assumptions

Hayat

I don't think we can do anything without assumptions. The residual

- 4 -

doubt

US govt; in time of TN attack, US agencies could ~~not~~ coordinate by communications & must be a single physical spot for performing these related functions. This seemed to be sensible under problems of mass destruction.

Winant Yes. we realized at High Point we were moving things re new materials & this not really a priority under these conditions. Also agree the parts of F.W. are related: last years study showed this but in place no one wanted to consider a new agency. Yes I think you must do realistic planning; up to someone else to say "no".

Gen The work of the group is to perform work until we can get further briefing from ODM. Next mtg Wed PM 2:30 PM 2:30
2:30 SA-7

NF Only TN was discussed? A new TN was?
 Winant At present, only the former is being considered.

re E. Pen paper

slight Believe this ^{paper} throws up hands;
we have the knowledge and believe
it should be used positively. Should
move in other direction

Zevin Zevs agree →

Gus You reported last week that
^{initial} in a State meeting guy ~~as~~ bureau
said there was an intra-State
vacuum. You also advised a memo something
like this is in works from Prochnow to Horn
calling for intra-State interagency mechanism

Doherty: My point is that your recommendation
that EPAC consider is appropriate
only if this is to be within
EPAC somewhere. I think it is
outside EPAC. I think we will
not "competent" ~~not~~ in that
EPAC T/R are too limited.

NF: When asked, I stated would request
paper be held over a meeting to
have our EPAC into consider.
Gus agrees.

Slaght I think EDAC community is competent

Doherty: I'd regret to have this considered as merely EC War. We should consider the overall requirements of diplomacy in each case.

I think this paper says EDAC can contribute but that putting together all parts has to be done outside EDAC.

Levin: This depends on how you define EC Reg.

Doherty: EDAC only exists due to MORA Act, US Ex Am Act.

BFC + Tr. Think EDAC has a part but not whole of prob.

Conclusion: make suggestions for changes; put on agenda for next meeting.
